CALLUS PILOT GUIDE PLUS

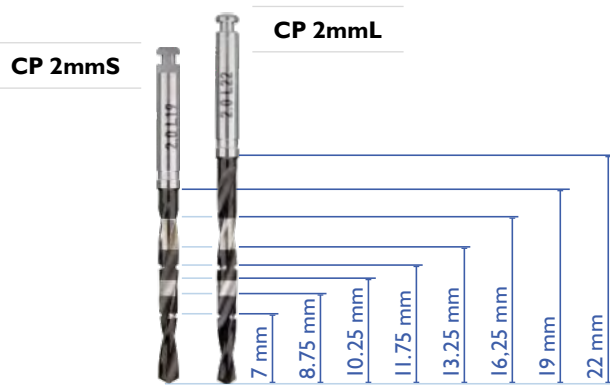

The Callus Pilot Plus concept offers a guided pilot drilling process in combination with special core drills and parallel pins. This unique solution allows for unrestricted access to the surgical site for final preparation. The basic surgical kit for the Callus Pro implant includes all necessary instruments, eliminating the need for additional purchases.

MANUAL AND NAVIGATED SURGICAL TRAY IN ONE

PILOT DRILLS

- + two different lengths for better access
- + Drill stop in combination with GSLEEVE

GSLEEVE

Easy placement in combination with in-office printed stents

CORE DRILLS

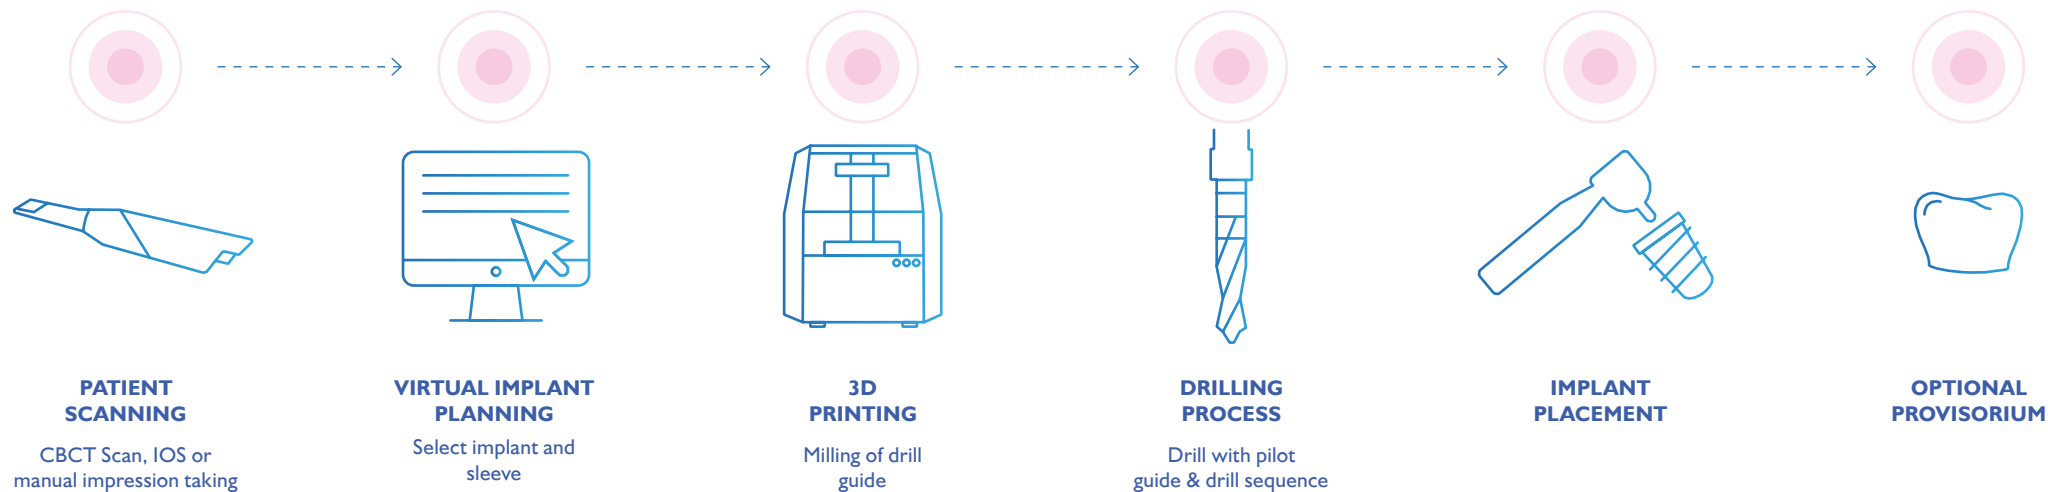

+ drill tip guided by previous drill

PARALLEL PINS

- + 3 different diameters
- + demonstrates osteotomy direction over the bone level
